

# POS SYSTEM INSTALLATION GUIDE

Check package and make sure you have received the following:

Description	Qty	picture	Description	Qty	Picture
POS terminal	1		POS power cable	1	
Store server	1		Store server power cable	1	
Receipt printer with electronic module <i>(electronic module is in the printer box)</i>	1		Ethernet cable	2	
Tablet	1		Mouse	1	
Power strip	1		Receipt printer cable	1	

## Step – by – step installation guide

**Receipt Printer:** *(The electronic module is in a little box in the receipt printer box)*

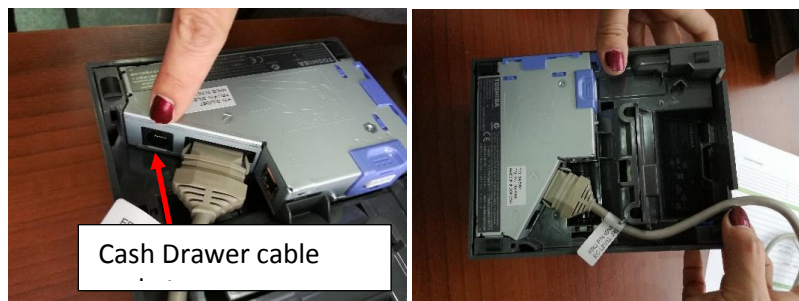

1. Connect Receipt printer cable to electronic module.

2. Place the module in the printer and gently press it in until it clicks.

3. Connect Cash drawer cable to the socket and route the cable

4. Open the printer, place the paper as shown and close it.

## Store Server:

**NB! IF YOUR ROUTER/SWITCH IS IN THE BACKOFFICE, CALL IT DEPARTMENT !!**

5. Plug in power cable and Ethernet cable to the Store Server.
6. Connect power cord to the power strip.
7. Connect the Ethernet cable to the switch.

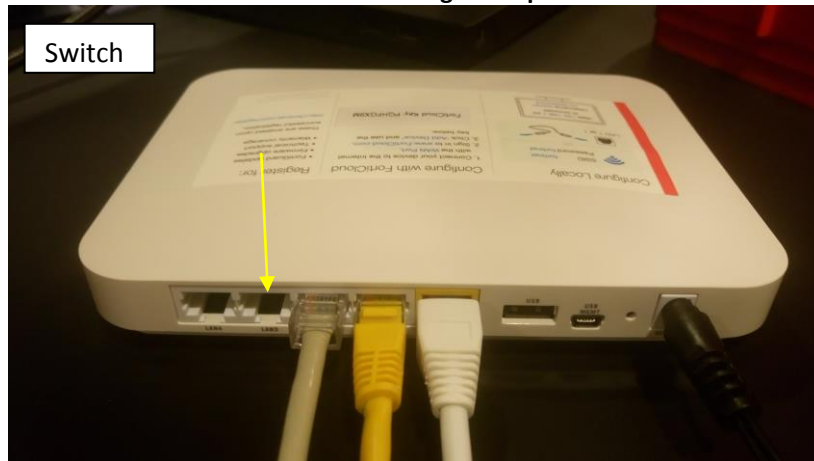

6. Power Cable

7. Ethernet Cable

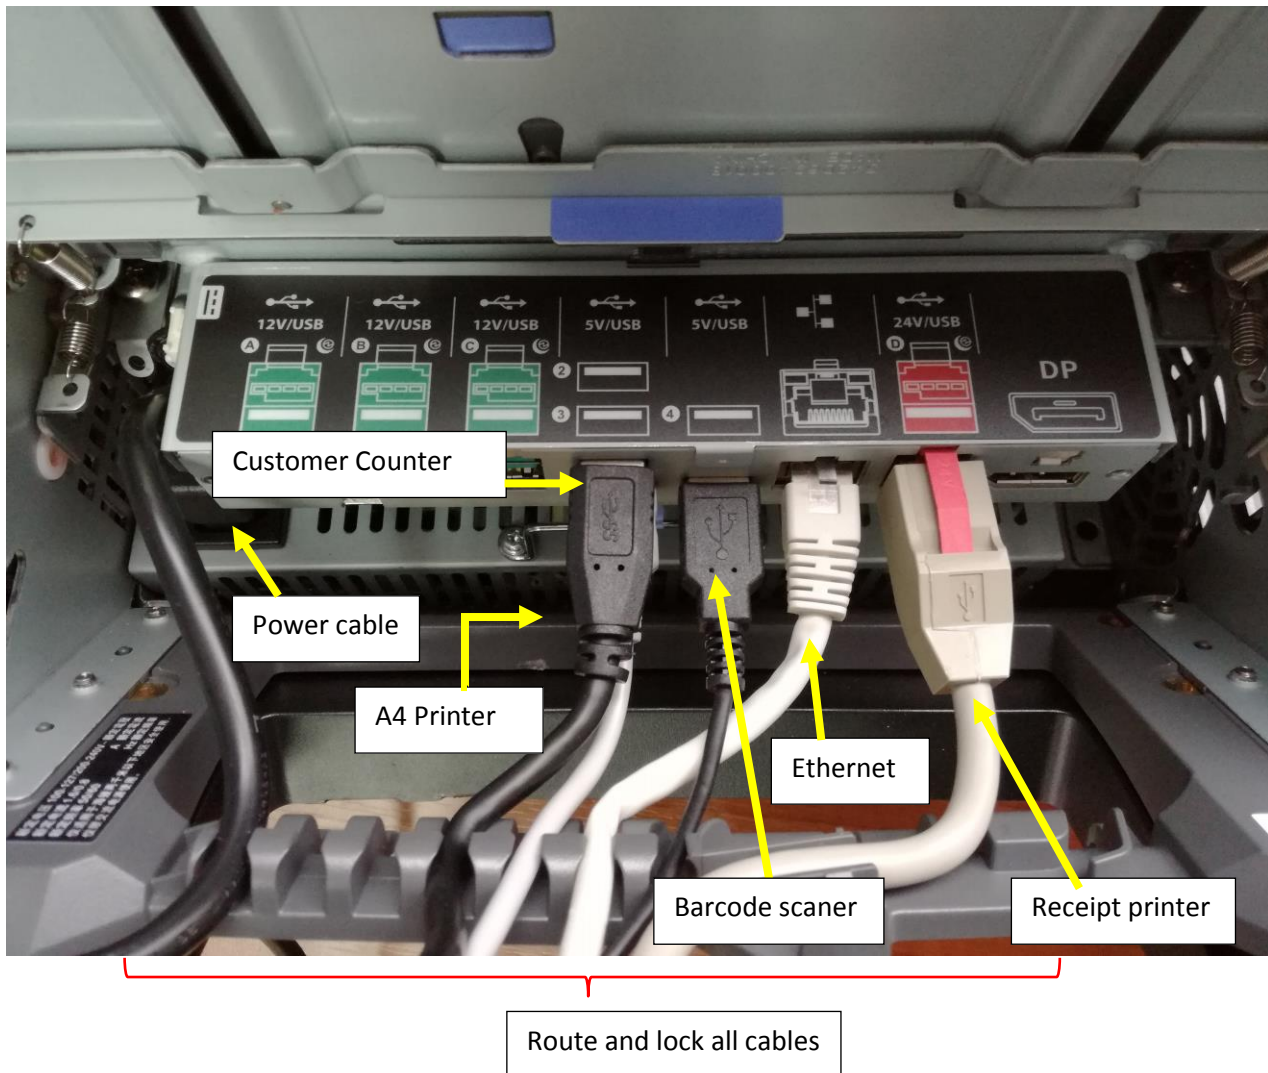

7. Ethernet cable from Store Server goes to port LAN3 on the switch

## POS Terminal – Cable instruction:

**NB! IF YOUR ROUTER/SWITCH IS IN THE BACKOFFICE, CALL IT DEPARTMENT !!**

8. **Connect the cables** (power, A4 printer, keyboard, barcode scanner, Ethernet and receipt printer) to the POS terminal. *(Keyboard USB cable can be plugged into the side, next to the screen of the Terminal)*

Ethernet Cable from POS Terminal goes to LAN4 port on the switch

## **A4 Printer:**

**NB !** A4 Printer USB cable **is not** a part of the package received. Use the existing USB printer cable from the store

9. Connect power and USB cable (the one You have just connected to POS) to the A4 printer

10. Connect power cord to the power strip

11. Turn on store server and POS Terminal by pressing power buttons and verify if it works.

**Congratulations!**  
**You have just finished the installation procedure.**  
**Enjoy using Your new POS system.**
